

DX-1500QVP

JUKI

QVP
Quilt Virtuoso Pro

*Professional Quality Quilting & Sewing Machine
Created for quilters, backed with industrial technology*

Thanks to Juki's industrial technology the DX-1500QVP makes it possible to sew and quilt beautifully!

Perfect Stitch Quality

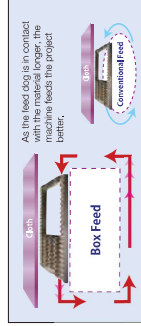

Capability to sew from light to heavy weight materials

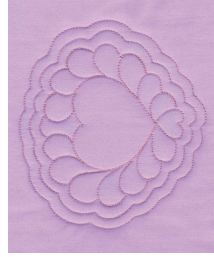

No fabric shrinkage even sewing on extra light weight materials. Thick handle can be sewn with ease.

Box feed-industrial sewing machine technology

In order to provide beautiful seams and outstanding feed performance, JUKI adopted box feed system. The conventional feed mechanism is oval motion. On the other hand, the box feed moves the feed dog in a box motion. This eliminates material shrinking and shifting. This accurate feeding system provides superior stitch quality for a variety of light to heavy weight fabrics.

Free motion sewing with stable thread tensions

Knee-lifting lever

Presser foot can be raised and lowered by the knee-lifting lever. Presser foot lift is up to 12mm when the lever is used.

Direct stitch pattern selection

Frequently used stitch patterns can be selected directly through the Direct Select mode.

Appique

Zigzag stitch for applique

Easy bobbin thread winding and quick bobbin preparation

Independent motor winds the bobbin thread. The bobbin preparation is easy. Just follow the guide and it is not necessary to pull up the bobbin thread.

Automatic needle threader

Needle can be threaded quickly and easily.

For Professional Sewing Results

Foot controller with thread trimming function

DX-1500QVP trims both needle and bobbin threads automatically by pressing the heel side of the foot controller. With this feature you can concentrate on your project while automatically cutting the thread.

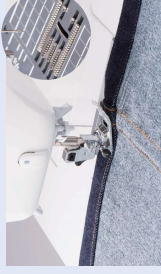

It is also possible to trim threads with a button located at machine body.

Powerful feeding

DX-1500QVP has powerful feeding thanks to a special steel feed dog and improved presser foot construction. Heavy material projects, such as hemming denim jeans, can be sewn with ease!

Presser foot pressure adjustment

Presser foot pressure can be adjusted for better sewing results according to the type of materials to be sewn.

Industrial quality buttonholes

Using a unique sensor method, DX-1500QVP sews beautiful buttonholes regardless of the type of material and overlapped sections.

16 types of buttonholes are available for your needs

S M L H

Now it is possible to adjust the cutting width in 3 steps

Wide sewing space

DX-1500QVP has a wider underarm space, with a wider table it is more enjoyable and comfortable to work with large projects.
