Wing Needle Embroidery

Supply List

- Machine with embroidery unit, embroidery foot, 150 x 240 (6 x 10) or larger hoop
- Light weight tearaway stabilizer or stitch-n-ditch. Whichever you have- It must be light weight, If you do not have this it is available at McDougals and you can get your class discount.
- Medium wt. tearaway will not work.
- Decorative threads- You will have much better results with rayon thread, but if you only have polyester it will work . The design has 6 color changes, but I used 5 and repeated one of the colors. Part of your registration includes a 18 x 18 piece of medium wt. Cotton in white for you to embroider on. Many people match the color of the wing needle stitches to the color of their fabric, so you may want to bring a white as well.
- Embroidery 75/11 or Microtex 80/12 needle
- Wing Needle 100/16 or 120/19- Available at McDougals if you need one.
- Sharp trimming scissors.
- Bobbin with an embroidery bobbin thread or a pre-wound bobbin
- Normal sewing/embroidery supplies
- We will not have time in class to finish all the edges, but you will learn 3 different methods you can use

It is important that the needle plate of your machine will accommodate a wing needle, so call if you are unsure.
