

## How to Hoop and Position your Embroidery

---

### Description:

Can't seem to get your designs where you want them?

Have a smaller hoop and you want to learn how to connect designs for a border?

Come to this hands-on class on placement and hooping. We'll learn how to position a name on a placement line, how to connect designs for a continuous border to use on a shower curtain, and how to line up multiple designs in one hoop.

You'll be using your embroidery machine for this hands-on class. We'll be doing practice samples so you can go home and use your new placement skills on your next project.

You must be familiar with your embroidery machine- how to thread your machine and use it for basic embroidery.

### Supply list:

1. Embroidery machine in good working order along with your embroidery foot, hoops you'll want to use and power cords.
2. Bring ½ yard of a solid cotton fabric, cotton only. This is for your samples.
3. Tear away stabilizer\* to go under your ½ yard fabric, more is better.
4. Fabric marker\*, chalk\* or Frixion pens\*.
5. Fabric and thread scissors\*, straight pins\*, Rayon thread\*- any color, Bobbin wound with bobbin thread\*, Embroidery needles\*-new-size 12 or 14.
6. A T-shirt to learn how to hoop one, we will not be doing a design in class on it so it could be an old shirt.
7. All your questions on positioning! You may want to bring something to take notes on also.
8. Any questions call Rebecca at 832-745-3469.
